RESPONSE

Honorable Commissioner for Patents
Customer Service Window
Randolph Building, Mail Stop Amendment
401 Dulany Street
Alexandria, VA 22314

Sir:

This is in response to the Examiner's action dated October 19, 2004. Record is also made of the personal interview held with Examiner Ho on January 12, 2005. The substance of that interview will be included in the discussion to be presented below.

The final rejection of claims 1-10 as unpatentable over Nap in view of Sahota is again traversed for the basic reason that neither of the applied references discloses a system that includes a "high compliance blocking balloon" as defined in parent claim 1 of the present Application.
